OUR COMMITMENT MAKES THE DIFFERENCE ►

BACO[®]

Baco fully committed into the future

A Key player on the market for control and signalling units, cam switches and switch disconnectors, Baco is recognized for its professional expertise and compliance with safety standards. Baco is committed to a quality charter based on the quality and reliability of its numerous and flexible solutions.

CONTROL AND SIGNALLING UNITS

► **A wide range**

- Excellent modularity for a large choice of combinations with a minimum number of items
- Customised products to meet the most specific needs

CAM SWITCHES

► **A reference on the market**

- A worldwide reputation of know-how for more than 50 years
- A range from 10 to 250 A (panel mount or enclosed)
- More than 50,000 different electrical diagrams available
- Numerous specific functions and special engravings

SWITCH DISCONNECTORS

► **Great flexibility in use**

- Compactness
- Infinite number of combinations for customised applications
- Reversible terminal blocks for front or rear mounting saving valuable time during installation

THE BACO QUALITY REQUIREMENT

Our products have a 10-year guarantee and are exceptionally reliable, that is why they are ideal for integration into systems that do not tolerate any failure (military, aeronautical, space exploration, medical research equipment, etc.). Moreover, BACO product ranges offer ingenious and reliable solutions that are fast and easy to implement.

That's why Baco is now providing a 10-year guarantee on all products. This guarantee strengthens the assurance of having a solid and committed brand by your side. With Baco, you can be sure that you have made the right choice.

Heads, blocks and connection...

designed to last!

► HEAD

“Cleverly designed to be both ergonomic and clearly visible”

- Insulating material ensures electrical safety
- Integrated anti-rotation tab
- Legend holder frame keeps IP 66 + IP 69K protection
- Optimised ergonomic design
- Choice of bezels: black or chrome plastic
- Innovative and varied functions
- Optimised dimensions

See pages 23 to 50

► CLIP

*“Flexibility of configuration: 1, 3 or 5 position clips
Contact blocks can be assembled in any order...”*

- Enhanced rigidity
- For 1, 3 and 5 blocks
- Blocks are simply snapped onto the clip

See page 69

► **BLOCK**

“Imaginatively designed to be safe, robust and durable”

- Securely fixed by clipping into place
- Stackable
- Grade protection: IP 20 as “finger safe” on screw and plug-in terminals
- Electrical insulation
- LED blocks combining long life and economy (100,000 hours)
- Corrosion resistant to some chemicals and sea air, etc
- Conform to standard EN/IEC 60947-5-1
- Compliant with RoHS European directive (concerning restriction of hazardous substances)

See pages 52 to 68

► **CONNECTION**

PLUG-IN TERMINALS

New heads...

robust and clearly marked!

► ADVANTAGES

We're full of innovative ideas from listening to your needs, and watching you work

- On all heads, rotation is prevented by a tab which retracts when not required
- Insulating material ensures electrical safety
- Design and shape help avoid build-up of dirt and make the switch easy to clean
- ISO 13850 illuminated mushroom head with yellow collar for side-on visual indication
- Optimised ergonomic design
- Innovative functions: illuminated emergency stop mushroom head, etc
- Optimised dimensions: low-profile heads

► **MARKING WITH LEGENDS**

- Frame can be turned to 4 positions (0° ; 90° ; 180° and 270°)
- Special legend plate for double touch
- Legend plates: choice between 5 colours, blank or pre-engraved

Bezels

Choice between:
black or chrome

Frame

round or square shape,
30 or 40 mm wide

Legend plate

can be clipped into
place after installation

Engraving

Button plate can be mounted in
4 positions (0° ; 90° ; 180° and 270°)

► **READY-ASSEMBLED CONTROL STATION**

- Innovative design
 - 1, 2 or 3 buttons
- See page 86

Simplicity, speed, choice!

► ADVANTAGES

Our objective is to simplify and shorten time of installation:

- Head held firmly in place by auto-grip ring, allows single-hand mounting
- Foolproof method of positioning the block sub-assembly correctly on the head
- Rotating metallic latch easily accessible with a screwdriver where space is limited
- Anti rotation tab to be aligned with notch of panel cut-out (p. 95), retracts when not required

Method for tightening the locking ring:

Tightening torque: 3 Nm or tightened with fixing tool (p. 82) to hand tight after pressure point plus another half turn.

Quick connection

No tool required for wires with ferrules.
New plug-in terminals

► CONFIGURATIONS

“A range designed to meet adapt to all requirements and all situations”

COMPLETE UNITS

- Control and signalling units are supplied ready for use with head and pre-assembled block/clip
- A single product code provides a solution for the most common needs

SEPARATE UNITS

- Maximum flexibility
- For numerous possible solutions

CUSTOMISED SOLUTIONS (request form p. 83)

- Custom assemblies to suit your needs
- The Baco response for specific requirements: pre-assembly, aesthetic design, engraving, etc

Products for industrial environments

► BACO PROVIDES SOLUTIONS FOR HARSH INDUSTRIAL ENVIRONMENTS

BACO push buttons Ø 22mm are available in plastic bodies and can be fitted with an external shroud to protect against liquid and dust ingress into the head itself.

All front elements are rated to a minimum IP 66 environmental rating, protecting against high seas, sprayed water and dirt. Many standard operators have more stringent IP 67 and IP 69K ratings, protecting from submersion and high-pressure/high-temperature wash down environments.

IP 66 - IP 69K E-Stops

IP 66 - IP 69K operators

IP 66 - IP 69K selectors

IP 66 - IP 69K pilot devices

► ACCESSORIES TO PERFORM

BACO Ø 22mm control and signalling devices can be equipped with protective shrouds which guarantee a degree of protection to IP 67 shrouds prevent ingress of water and dust.

Shrouds for Twin touch operator

Shrouds for projected operator

Shrouds for flush operator

IP 67 Shrouded Twin touch operator

IP 67 Shrouded projected operator

BACO operators to meet the needs of industries such as:

- | | |
|-------------------|-------------------------|
| Outdoor Machinery | Trucking/Transportation |
| Food processing | Mobile Machines |
| Pharmaceutical | Material Handling |
| Petrochemical | Marine |
| Waste Treatment | Metal Forming |
| Bottling | Mining |

Degree of ingress protection

► WHAT IS THE MEANING OF IP 66/67/69K PROTECTION DEGREE?

IP 66/IP 67 protection degrees are degrees of protection provided by the standard (respectively against strong water jets and temporary water immersion). BACO has introduced on its products IP 69K protection degree (against water jets with high temperature and pressure), to offer the maximum achievable and testable performances, fulfilling more strict standards.

Illuminated or non-illuminated, momentary or maintained action pushbuttons, selector switches, emergency stop buttons and pilot devices for harsh environments, sealed to IP 67 or IP 69K when manufactured after week 36_2015.

► WATERPROOF ACCORDING TO IP 66

BACO's control & pilot devices are protected from total dust ingress. Protected from high pressure water jets from any direction too.

► WATERPROOF ACCORDING TO IP 67

BACO's control & pilot devices are perfect for tough environments where a waterproof enclosure is required. Shrouded modular devices are approved according to IP 67. The products are protected against the effects of temporary immersion in water, one meter down, for up to 30 minutes.

► TOUGH AND ROBUST ACCORDING TO IP 69K

The IP 69K certification was initially developed for applications that need regular intensive cleaning (dump trucks, cement mixers, etc.).

BACO's control devices are certified according to IP 69K meaning you do not have to worry about treating them rough. Spray them with water or leave them out in the snow. They will stay reliable and functional.

Block holder clips for assembly as you require

1, 3 or 5-position clips

▶ CLIP

"A flexible configuration for assembly in any order..."

▶ 3 BLOCKS

▶ 5 BLOCKS

▶ MODULAR

Stacking without accessories

- Snap fit, tools not required to attach contact blocks
- Cost effective solution: 1 position clip
- Blocks can be stacked on 2 levels, up to 3 blocks wide
- Blocks can be assembled in any order (except pilot light)
- Optimised dimensions: reduced depth of blocks

▶ BLOCK

"Imaginatively designed to be safe, robust and durable"

▶ MATERIAL

- IP20 as "finger safe"
- Electrical insulation
- Corrosion-resistant

▶ ENVIRONMENT

- Respect for the environment, RoHS compliant

- LED blocks: combine long life and economy
- Corrosion resistant to some chemicals and sea air, etc
- Conform to standard IEC 60947-5-1
- Conform to RoHS European directive concerning restriction of hazardous substances

Separate units: Blocks sub-assemblies

▶ EMERGENCY STOP ACTUATORS - ISO 13850:

According to IEC 60947-5-5, the emergency stop function can be provided by an ISO 13850 mushroom head combined with a «positive opening» NC contact block.

The mechanism of our ISO 13850 mushroom heads is so designed that a «push» action of sufficient force to open the contact systematically triggers an irreversible locking of this opening. This generates an «emergency stop» signal which can be cancelled only by deliberate manual resetting of the mushroom head (pull and turn or unlocking by key).

This function allows to generate an «emergency stop» signal for any equipment subject to directive 98/37CE (machinery safety) completed by the IEC 60204-1 standard.

The ISO 13850 mushroom heads also comply with the safety requirements detailed in standard ISO 13850.

► DESIGN AND FUNCTIONS

- 45° switching angle
- Forced opened contacts
- Finger protected (degree of protection up to IP 20)
- Short-circuit rated
- Fulfills the load of break requirements up to 690 V
- Terminal screws in open position
- Switching capacity I_e (A): 16 A, 25 A and 32 A in AC21
- Manually operated control switches
- Front presentation: aluminium plate with black handle with index
- Laser marking on escutcheon
- Front degree of protection IP 40
- 2-screw panel mount - interval 30 mm

► APPLICATIONS

- ON-OFF switches
- Changeover switches
- Multi-step switches
- Instrument switches

Separate cam switches

To order your cam switch, it is essential to follow the 5-step procedure (see presentation on p. 127)
Mini cam switches are only available in standard versions.

► I - CHOICE OF SWITCH SIZE

TECHNICAL CHARACTERISTICS

The choice of switch size depends on the type of load to be switched
Cam switches are devices designed mainly for use with AC current
When using with DC current, you must use a reduction coefficient (see previous page)

PRICE LIST CODE

The price list code allows you (if necessary) to determine the price of the chosen switch by referring to the current price list

EXAMPLE

1 You are looking for a switch to control motors (3x230 V) with a power rating of 18.5 kW, what you need is a **PR 63**.

Characteristics	PR 12	PR 17	PR 21	PR 26	PR 40	PR 63	PR 125	PR 160

► II - CHOICE OF FUNCTION (DIAGRAM AND SWITCHING ANGLE)

FUNCTIONS

The electrical circuit diagram for separate switches can be:

► A standard diagram (see p. 207 to 238).

Examples:

► A special diagram to your own requirement (complete the form on p. 277)

EXAMPLE

1 The reference of the diagram for a 1-2 contact switch (p. 208) is: **1101**, and its price list code is: **A01Z**

To order your cam switch, it is essential to follow the 5-step procedure (see presentation on p. 127)
Mini cam switches are only available in standard versions.

► II - CHOICE OF FUNCTION (DIAGRAM AND SWITCHING ANGLE)

FUNCTIONS	Diagram	Page
<p>► Switches From 1 to 24 poles, each pole being a path for the current, the circuit being open at starting position 0, and closed at position 1</p>		218
<p>► 2 way change-over switches without off position From 1 to 12 poles, each pole having 2 current paths, one path is closed at position 1, the other at position 2 The two paths can be joined by a common point (link)</p>		219
<p>► 2 way change-over switches with off position From 1 to 12 poles, each pole having 2 current paths, one path is closed at position 1, the other at position 2. Both paths can be open at position 0 and joined by a common point (link)</p>		220
<p>► 3 to 8-way cam switches Each pole having respectively 3 to 8 paths for the current, the number of poles multiplied by the number of ways must be 24 or less The starting position is either 0 (diagram with OFF) or 1 (diagram without OFF) The current paths of the same pole are connected together by links</p>		221
<p>► Grouping switches From 2 to 4 ways with or without starting position at 0, each pole having respectively 2 to 4 current paths which close consecutively and remain closed on the following positions, thus grouping 2 to 4 elements The current paths of the same pole are connected together by links</p>		233
<p>► Instrument switches For ammeters wired without a CT or with several CTs connected on the corresponding circuits The CTs can be mounted in series, with a common point or independently, they are always short-circuited when not feeding the ammeters</p>		236
<p>For voltmeters wired into 3-phase networks with or without neutral</p>		238
<p>► Motor control switches For 3-phase asynchronous motors with Y - ▲ starting, with several speeds, with or without reversing</p>		239

Protection class

The IP (Ingress Protection) rating system is published by the IEC (International Electrotechnical Commission) and classifies the degree of protection against solid objects and liquids in order to operate the electrical equipment.

1 Protection Against Solid Objects

2 Protection Against Liquids

First digit of IP-Codes

1.digit		Meaning	
ISO 20653	IEC 60529	Protection against objects	Effective against
0	0	No protection	No protection
1	1	Solid objects $\geq 50\text{mm}$	Any large surface of the body, such as the back of a hand, but no protection against deliberate contact with a body part
2	2	Solid objects $\geq 12.5\text{mm}$	Fingers or similar objects
3	3	Solid objects $\geq 2.5\text{mm}$	Tools, thick wires, etc.
4	4	Solid objects $\geq 1\text{mm}$	Most wires, screws, etc.
5K	5	Dust protected	Ingress of dust is not entirely prevented, but it must not enter in sufficient quantity to interfere with the satisfactory operation of the equipment; complete protection against contact
6K	6	Dust tight	No ingress of dust; complete protection against contact

Second digit of IP-Codes

2.digit		Meaning
ISO 20653	IEC 60529	Protection against water
0	0	No protection
1	1	Dripping water (vertically falling drops) shall have no harmful effect.
2	2	Vertically dripping water shall have no harmful effect when the enclosure is tilted at an angle up to 15° from its normal position.
3	3	Water falling as a spray at any angle up to 60° from the vertical shall have no harmful effect.
4	4	Water splashing against the enclosure from any direction shall have no harmful effect.
5	5	Water projected by a nozzle (6.3 mm) against enclosure from any direction shall have no harmful effects.
6	6	Water projected in powerful jets (12.5 mm nozzle) against the enclosure from any direction shall have no harmful effects.
7	7	Ingress of water in harmful quantity shall not be possible when the enclosure is immersed in water under defined conditions of pressure and time (up to 1 m of submersion).
8	8	The equipment is suitable for continuous immersion in water under conditions which shall be specified by the manufacturer. Normally, this will mean that the equipment is hermetically sealed. However, with certain types of equipment, it can mean that water can enter but only in such a manner that it produces no harmful effects.
	9	Protected against close-range high pressure, high temperature spray downs.
9K		Protected against close-range high pressure, high temperature spray downs, specific for cars.
